2018 – 2020

Information Technology Faculty

PERSONAL INFO

Starting from the second year, I worked in the area of Embedded and Software development in Poland, where actually I graduated.

At the end of May, I moved to Ukraine, Kyiv for family reasons. The area of my interest is Backend and DevOps technologies. I would like to apply my skills and get new skills both in the above and in other areas.

Besides, I have to mention that I learn quite easily, quickly pick up and process new information, which, I believe, is an extremely useful quality for an IT guy.

In addition, I will be grateful for constructive criticism and the opportunity to learn from my mistakes.
